

INTRODUCING THE CIRC – BUILDING STRONGER REFERRAL RELATIONSHIPS THROUGH EDUCATION (PART 5)

The Comprehensive Implant Restorative Continuum through Martel Academy reaches its culmination in Session 5. This final full-day program brings everything together with a strong emphasis on occlusion in implant dentistry and the critical steps for successful final delivery. Participants explore implant-specific occlusal principles that differ from natural tooth mechanics. The session covers how to establish proper contacts, manage forces, and protect restorations from excessive loading. Dentists learn practical strategies for achieving balanced occlusion that supports long-term stability and patient comfort.

Final delivery marks the rewarding endpoint of the restorative journey. Instructors guide attendees through proven protocols for seating restorations, verifying fit, adjusting as needed, and confirming function. Attention to detail here prevents common issues like loosening or tissue irritation down the road.

Case planning continues as a core activity. Dentists review additional real-world examples, refine their approach to complex situations, and integrate lessons from all previous sessions. The interactive format encourages open discussion, troubleshooting, and peer-to-peer learning that solidifies clinical judgment.

By the end of Session 5, general practitioners leave with a complete framework for handling implant cases from start to finish. They gain the confidence to deliver durable, functional restorations while maintaining strong collaboration with surgical specialists.

Completing the full CIRC series transforms how dentists approach implant care. Practices see more opportunities, higher patient satisfaction, and smoother workflows. Specialists who support this program in their networks build deeper referral relationships rooted in shared expertise and trust.

This educational journey through Martel Academy equips participants to elevate their restorative skills and contribute to better patient outcomes across the board.
